Amorim Cork

Central node: How can we, 4.3 and 4.4 help Amorim Cork recycle, reuse or compost cork by 2025 to ensure it meets APCO standards?

Money (branch)

- Can we sell them in the shops?
- Could we get 5c or 10c when we recycle the corks?
- What makes the corks unusable?
- How much would people pay for old corks?
- Could there be a recycle refund for cork?
- What happens to them?
- Could Amorim sell old corks to someone to reuse?
- How will we make sure Amorim still make a profit?
- Could Amorim fund some incentives to recycle cork like $1 discount when you return 5 corks?
- How much money does Amorim lose in old corks?
- How much does it cost to make a cork?
- How much does Amorim Cork make each year?
- How much money is a single cork?

Cork, the product (branch)

- Can we make animal houses out of cork?
- Do animals use cork in their environment?
- How has it been used in history?
- Who invented the cork?
- What are the benefits of cork trees in the wild.
- When was is first used in the top of a bottle?
- Why is cork so important?
- What species of cork tree are there?
- Are there different species of cork tree?
- Does cork desolve?
- Can you cut cork up?
- What is the compostion of cork?
- Can we change the composition of cork?
- Does cork burn?
- Can you combine cork with another material to make something else?
- Can you shrink cork?
- Does cork absorb smell?
- Why are corks so light?
- Can you break cork?
- If we added water would it break down faster?
- Why does cork float?
- How can we make it easier for cork to break down without hurting the environment?
- Why does cork take so long to break down?
- Does breaking the cork up help it to compost?

Sustainability (branch)

- Can we buy a machine to process the corks into a reusable product?
- Why does it have to be done by 2025?
- Can we ask for more time?
- Are there other countries that recycle cork?
- Which countries already recycle cork?
- How do other countries recycle cork?
- Can animals eat cork?
- Can we make fertiliser from cork?
- What are the ingredients in fertiliser?
- Why do APCO have these new rules?
- Could we make cork safe to eat?
- Which bin do people put their corks in?
- How can we get people to stop putting cork in the red bin?
- How long would it take to get the bins to people around Australia?
- How long would we have to recycle the corks to make a difference to the environment?
- Could APCO help?
- How can we recycle cork?
- What product are already recycled?
- How are they recycled?
- Could there be a bin for cork?
- Who would make the bin?
- How long would it take to collect enough corks?
- What products are made from cork?
- How can we reuse cork?
- Could cleaned corks be reused in bottles?
- Could they be used for educational purposes?
- Who would manage the bins?
- Can we put recycled cork into shoes?
- Could cork be used for the sole of the shoe?
- Which company would make this?
- Could they be used inside sports balls?
- How do we work out who would recycle cork?
- Could you use the same machine that recycles plastic with cork?
- Could there be cork in Nerf bullets?
- Could we put cork in paint ball bullets?

Amorim the Company (branch)

- How long has Amorim been around?
- Who do they already partner with?
- Who is the founder of Amorim?
- How long does it take for the cork to travel to Australia from Portugal?
- Who could they partner with?
- Does 'Amorim' mean something?
- What countries does Amorim supply cork to?
- What is the process to make a cork?
- Why is Amorim Cork in Australia?
- Are there other cork companies?
- Is there a limit to how much bark you can take from the cork tree?
- What do other countries do with their left over cork?
